

# FIND YOUR MATCHING AM SUBSYSTEM WITH OUR NEW PRODUCT SELECTOR!

*Posted on April 19, 2023*

We offer a wide range of state-of-the-art projectors, lenses, and systems for various additive manufacturing applications. Your time is valuable, so we have developed a Product Selector tool to help make selecting the right system to suit your needs go faster.

Whether you are looking for microscopic precision, a "workhorse" to boost production capacity, or a system to handle large builds fast – If you know your requirements, you can enter them into the filters, select from the matching system and lens results, and learn what they can do for you.

Since our various subsystem features and specifications can be complex at first glance, **we always recommend [contacting our experts](#) for an in-depth consultation that considers all your requirements.** Use our Product Selector to quickly browse which systems, projectors, and lenses to add on your candidate list, but contact our team to ensure the choice you make is the best match for

you.
